STRATEGY & OPERATIONS

POSITIONING = Diagnostic Specialist

Focus on high-value, fast-growing diagnostic niches rather than commoditized routine testing.

- **“Razor-and-blade” Model:** Analysers + Test kits / reagents
- **In-house activities:** R&D | Production | Quality control | After-sales service

⇒ **HIGH MARGINS & RECURRING REVENUES**

PRODUCT DIVISIONS

1 IMMUNODIAGNOSTICS
Analysis of antibodies and antigens

2 MOLECULAR DIAGNOSTICS
Analysis of pathogens

3 LICENCED TECHNOLOGY
Solutions for biomedical research

4 COVID
Sales connected to COVID

**B2B2C
HOSPITALS**

*Patient
diagnostics*

INVESTMENT THESIS

Post-COVID Repositioning for Growth, at a Discounted Valuation.

WHY THIS COMPANY & THIS INDUSTRY?

GLOBAL STRATEGY REASSESSMENT

- **US Market as main growth engine:** Diasorin is on track to reach 600 hospitals by 2027
- Declining testing demand in **Europe:** Closing of German production plant & Consolidation of all volumes into the Italian and UK plants
- **Chinese VBP tendering** favours domestic producers: Creation of production plant in China, to circumvent volume gap and downward pricing pressure & Strategic pivot toward specialty assays
- Strategic shift toward **higher-value segments:** ARIES Divestment

TARGETED R&D REINFORCING WINNING MOAT

- Continuous investments in new technologies, targeting **niche diagnostics**
- Innovation to enrich the catalog / assay of existing technology

STABLE & GROWING INDUSTRY

- **Industry growth drivers:** Ageing population & Increase precision medicine -> CAGR $\approx$ 7%
- Non-discretionary-nature of products ensures stable demand
- DiaSorin Beta (3-year weekly) = 0.65

WHY NOW?

1

DISCOUNTED PRICE

In Nov 2025, stock prices dropped following downward revisions of growth expectations

2

AHEAD OF CAPITAL MARKETS DAY (mid-2026) & GUIDANCE REVIEW (03-2026)

We anticipate the market, as we are confident prices will rise after the events mentioned above

3

RECENT PROOF OF STRONG PROGRESS IN EXPANSION TO THE US

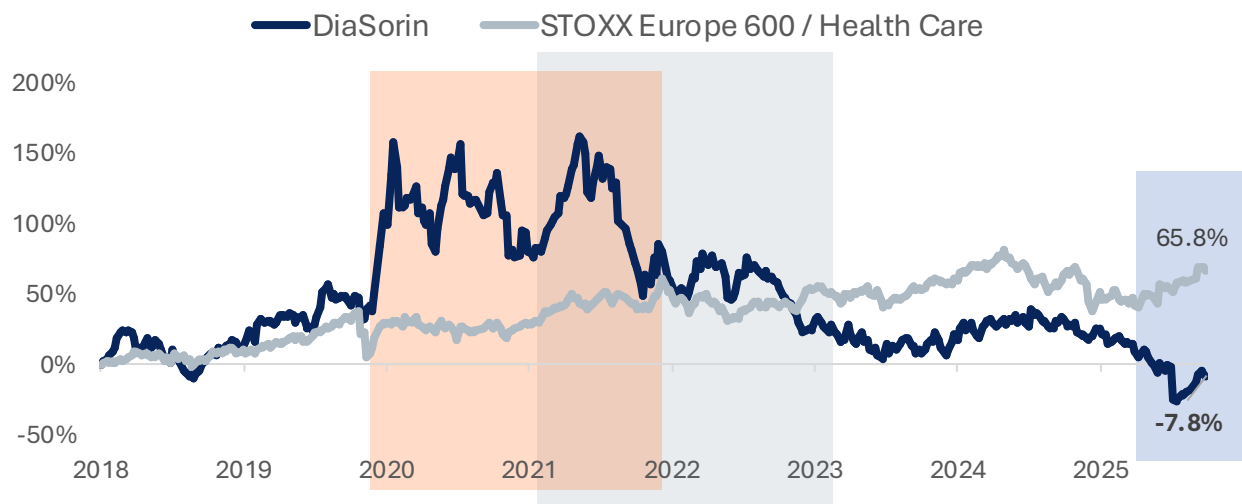

FDA Approval of Molecular Diagnostic Tech & Exclusive distribution contract with Fisher Scientific

Why is the market underpricing DiaSorin?

The market is over-penalizing short-term (non-structural) Europe/China headwinds and is still anchored to post-covid normalization

FINANCIAL ANALYSIS

From COVID-driven Peak to Post-pandemic Normalization.

COVID-19 2020-2021

- Flagship test: Simplexa COVID-19
- Significant **revenue growth**, up by 24%
- Margins increased to 43%
- Stock P = 202€

LUMINEX 2021-2023

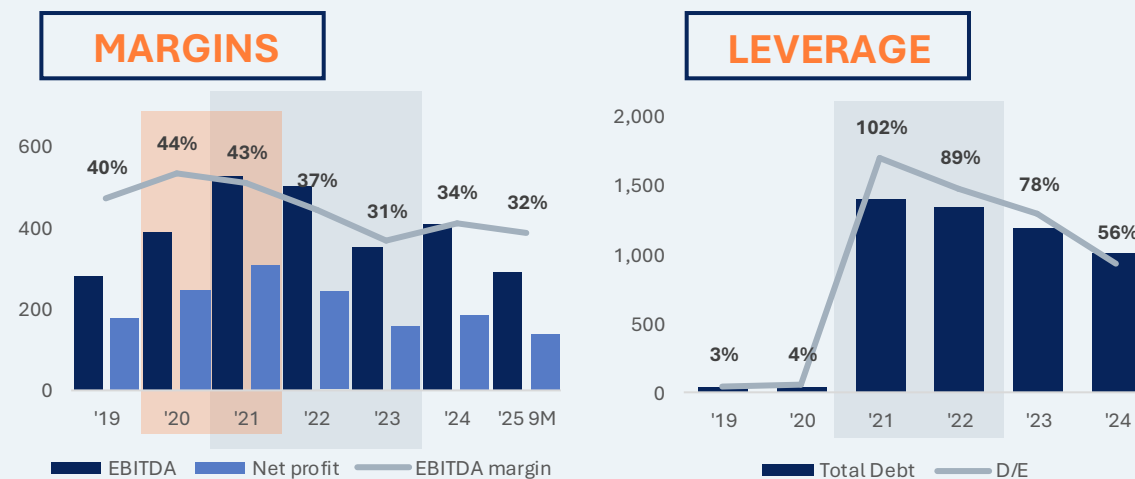

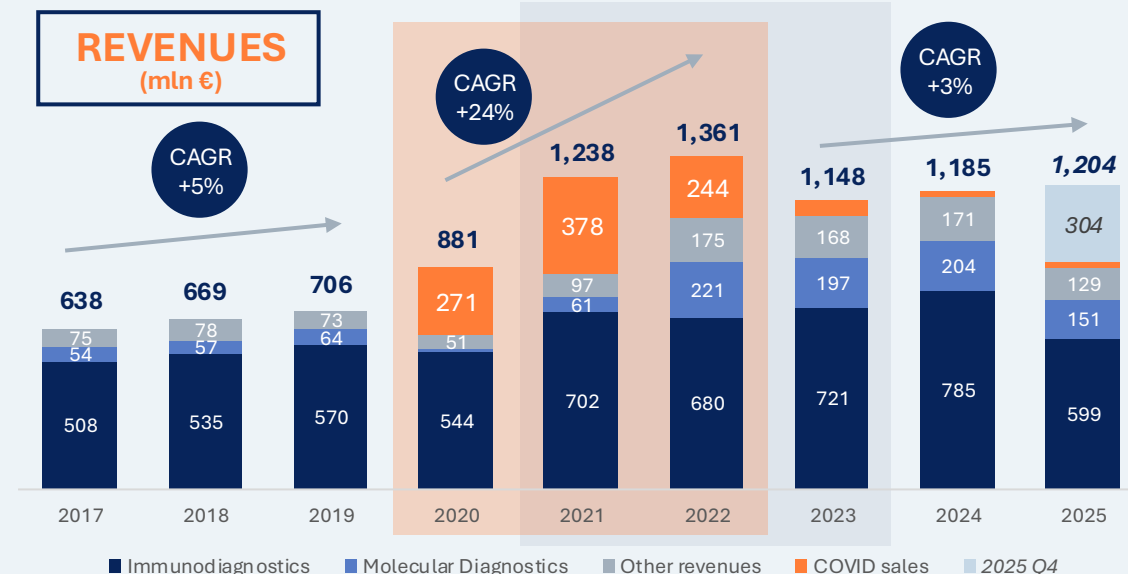

- Challenging Luminex acquisition
- Low margins in 2023 (31%)
- Leverage grew exponentially, driven by debt financing of acquisition

POST-COVID 2023-2024

- Steep decline in revenue growth
- Lagged post-COVID normalization
- Permanent change in product mix, towards specialty tests

CURRENT 2025

- Revised its growth outlook **from 8% to 5%**
- New regulatory changes in China & Germany
- Weaker demand in Italy
- FX Losses

COMPELLING VALUATION OPPORTUNITY

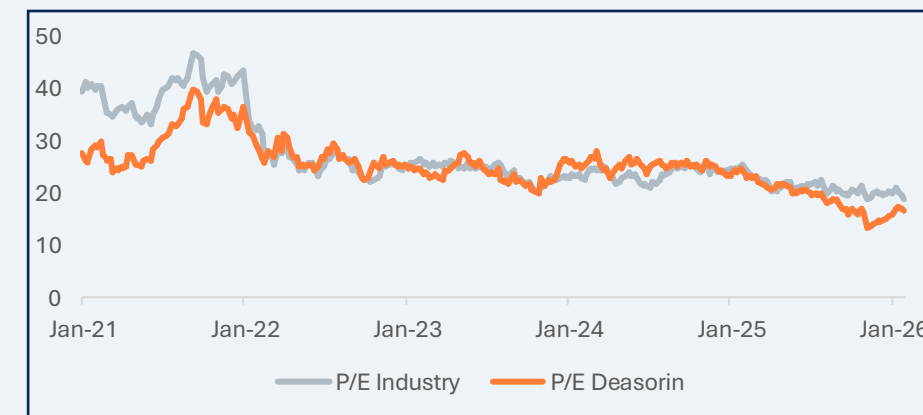

DCF and Trading Multiples Indicate Material Undervaluation

KEY ASSUMPTIONS

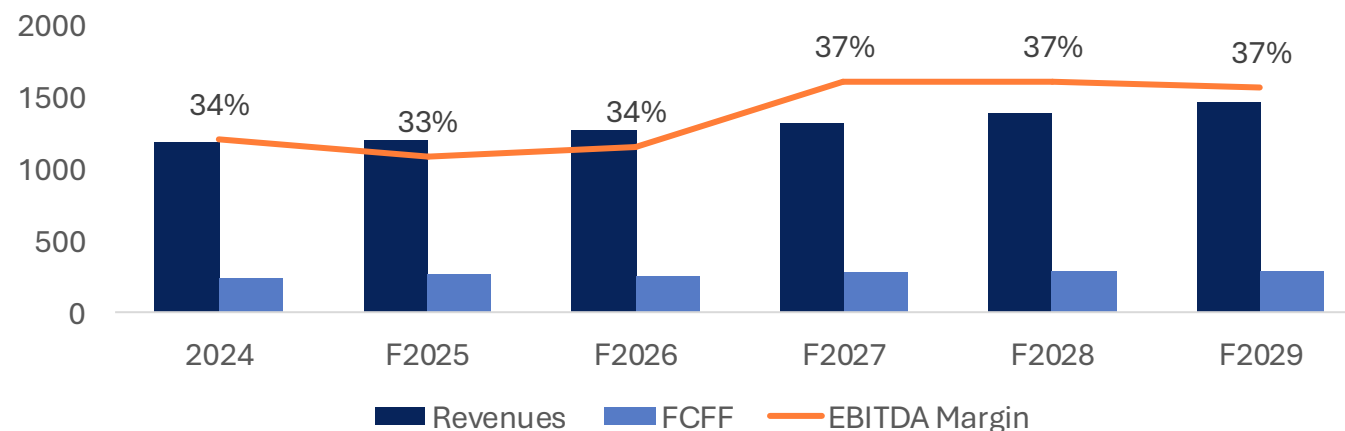

- **Revenue growth:** 5% (guidance); 8% (old); flu-season catchup
- **Operating margin:** 37% by 2027
- Stable D&A; Capex; Consistent with past
- **WACC = 6.4% with 10Y Bund at 2.8% & Beta adj. of 0.68**
- **Terminal growth rate = 2.5%;** Inflation & Continued growth of Market
- **Peers:** Siemens Healthineers AG; Agilent Technologies, Inc.; Inc.; bioMerieux SA; Sysmex Corporation

	EV/EBITDA LTM	P/E LTM
Peers Average	15.50	32,81

PE & EBITDA Mult. 3Y Average Pre & Post Covid

AN UNDERVALUED RESILIENT PLAYER

Compelling Risk-Reward Profile Supported by DCF, Multiples and Capital Returns

KEY RISKS

Company specific risks:

- Potential competition on prices
- Relatively small player in industry dominated by pharma giants
- FX fluctuations

Sector generic risks:

- US/EU Healthcare Regulatory changes (Germany reimbursement risk); cautious Danaher and Fisher
- US Tariffs
- Weak life science business

INVESTING IN DIASORIN

UPSIDE: 39% + 2% Div Yield

INVESTMENT PERIOD:
1Y timeframe; 3-5Y fund

Key Events:

- March 2026 Guidance, Mid-26 CMD
- US court ruling against NIH budget restrictions; PAMA delay reducing short-term reimbursement
- Potential for continued buyback (€ 250 mln); CEO Share Purchase
- M&A opportunities (Qiagen)
